

KDi's Coaching Certification Now Available

KDi's certification course is based on a proprietary change process tested and refined over two decades with clients from three continents. The course is based on KDi's highly praised book *Leading Change that Matters*.

Offered as a series of live webinars grounded in experiential learning, participants collaborate by taking on key roles in leading change based on an extended scenario relevant to their interest and job function.

Senior coaches customize our Adaptive Pathway and Change Facilitation models to benefit:

1. KDi Americas and KDi Asia's own management teams
2. Key personnel responsible for our clients' change initiatives
3. Carefully selected change consultants who wish to utilize our model in their practice

On successful completion of the program, KDi certified Change Coaches will be able to:

- Lead and manage dynamic change congruent with their role
- Empower others to adopt change that matters
- Create and lead teams that are resilient in the face of change
- Actualize the KDi model with key projects as a dynamic, integrated process that ensures leading from the front when unexpected, chaotic change happens.
